PROFICARGO

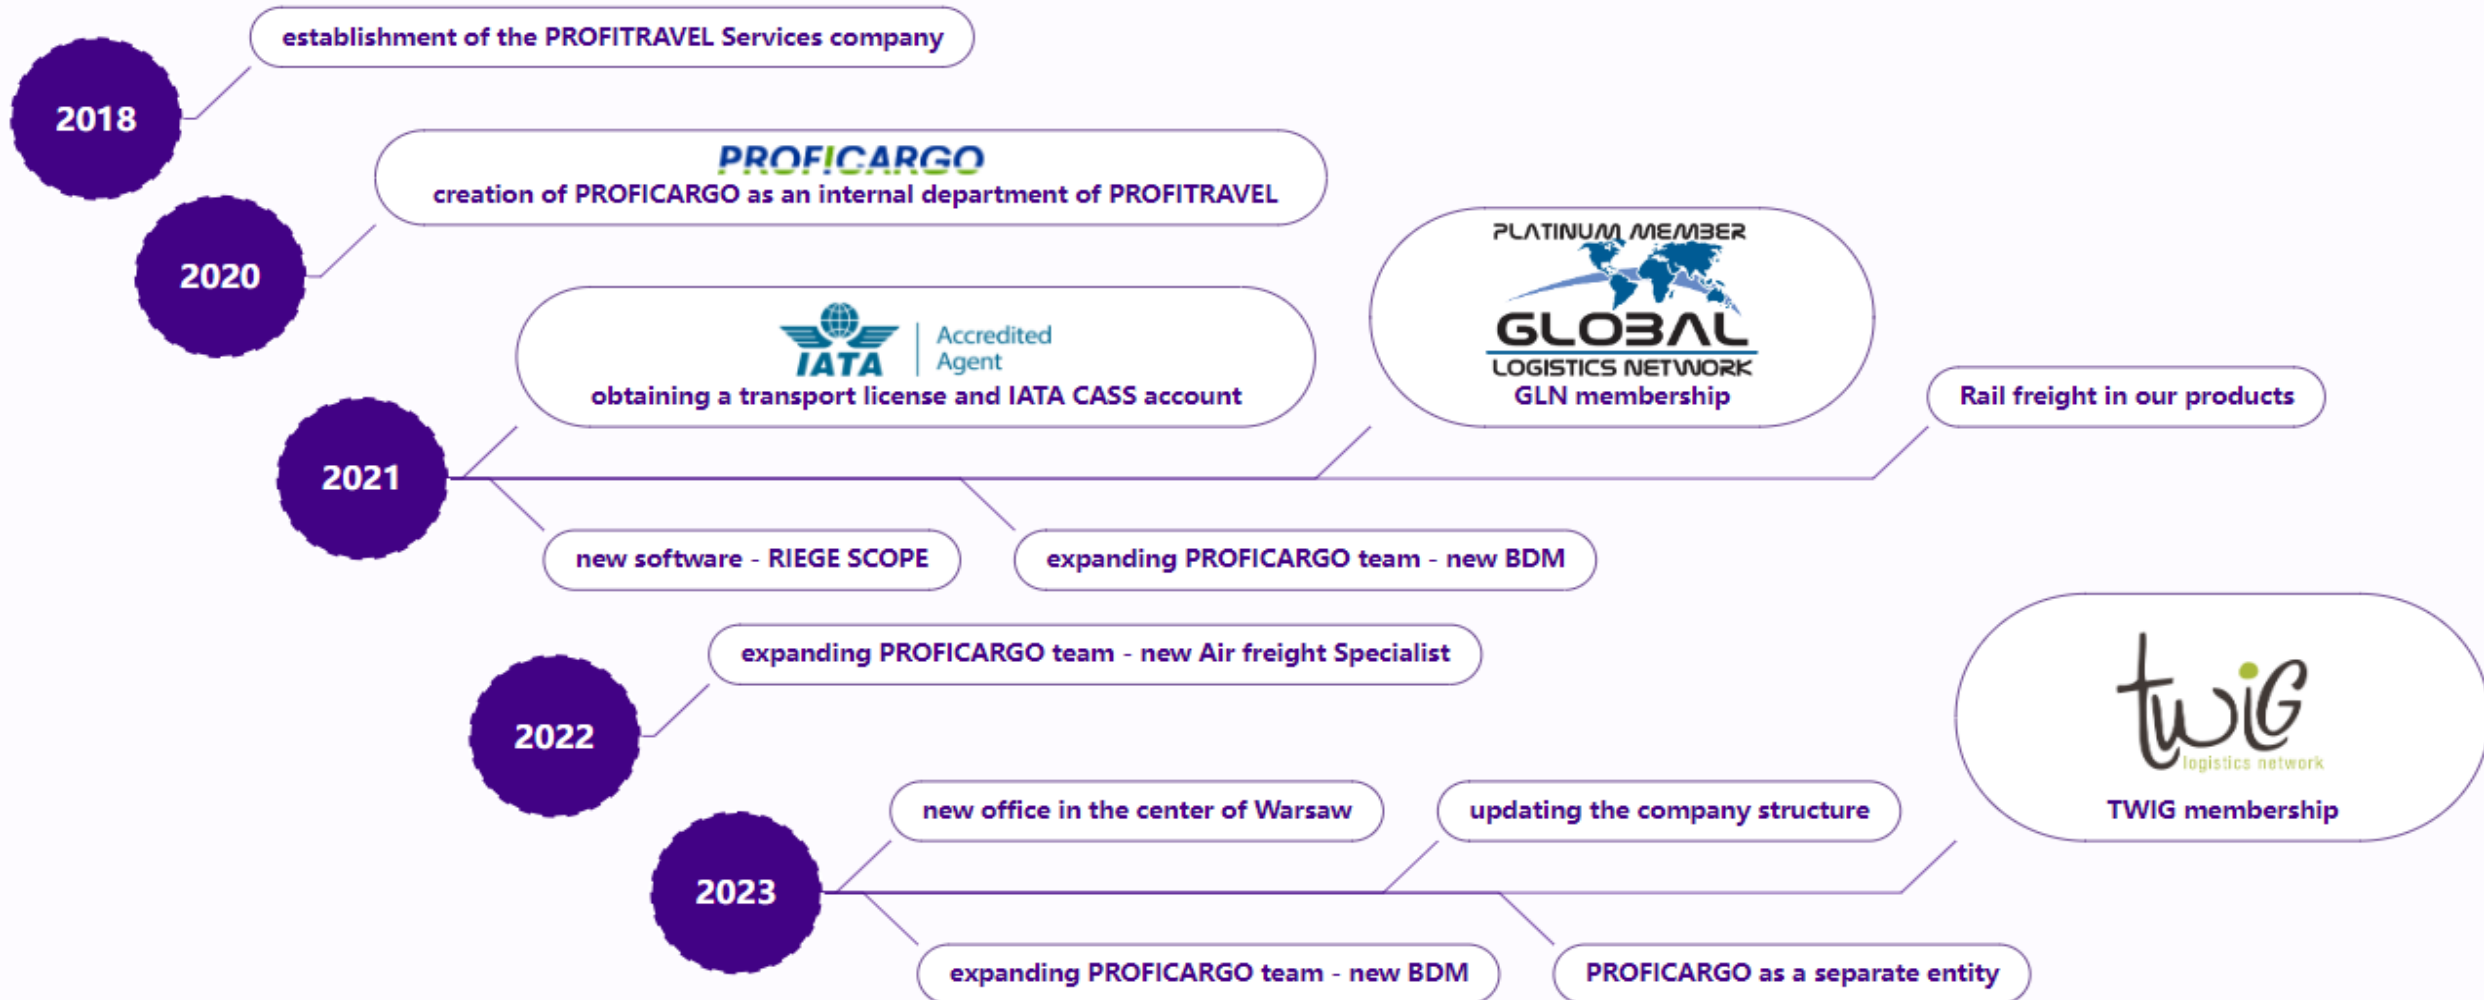

History

PROFITRAVEL Services Sp. z o.o. was established in 2018, with our main goal to provide both business and holiday travels.

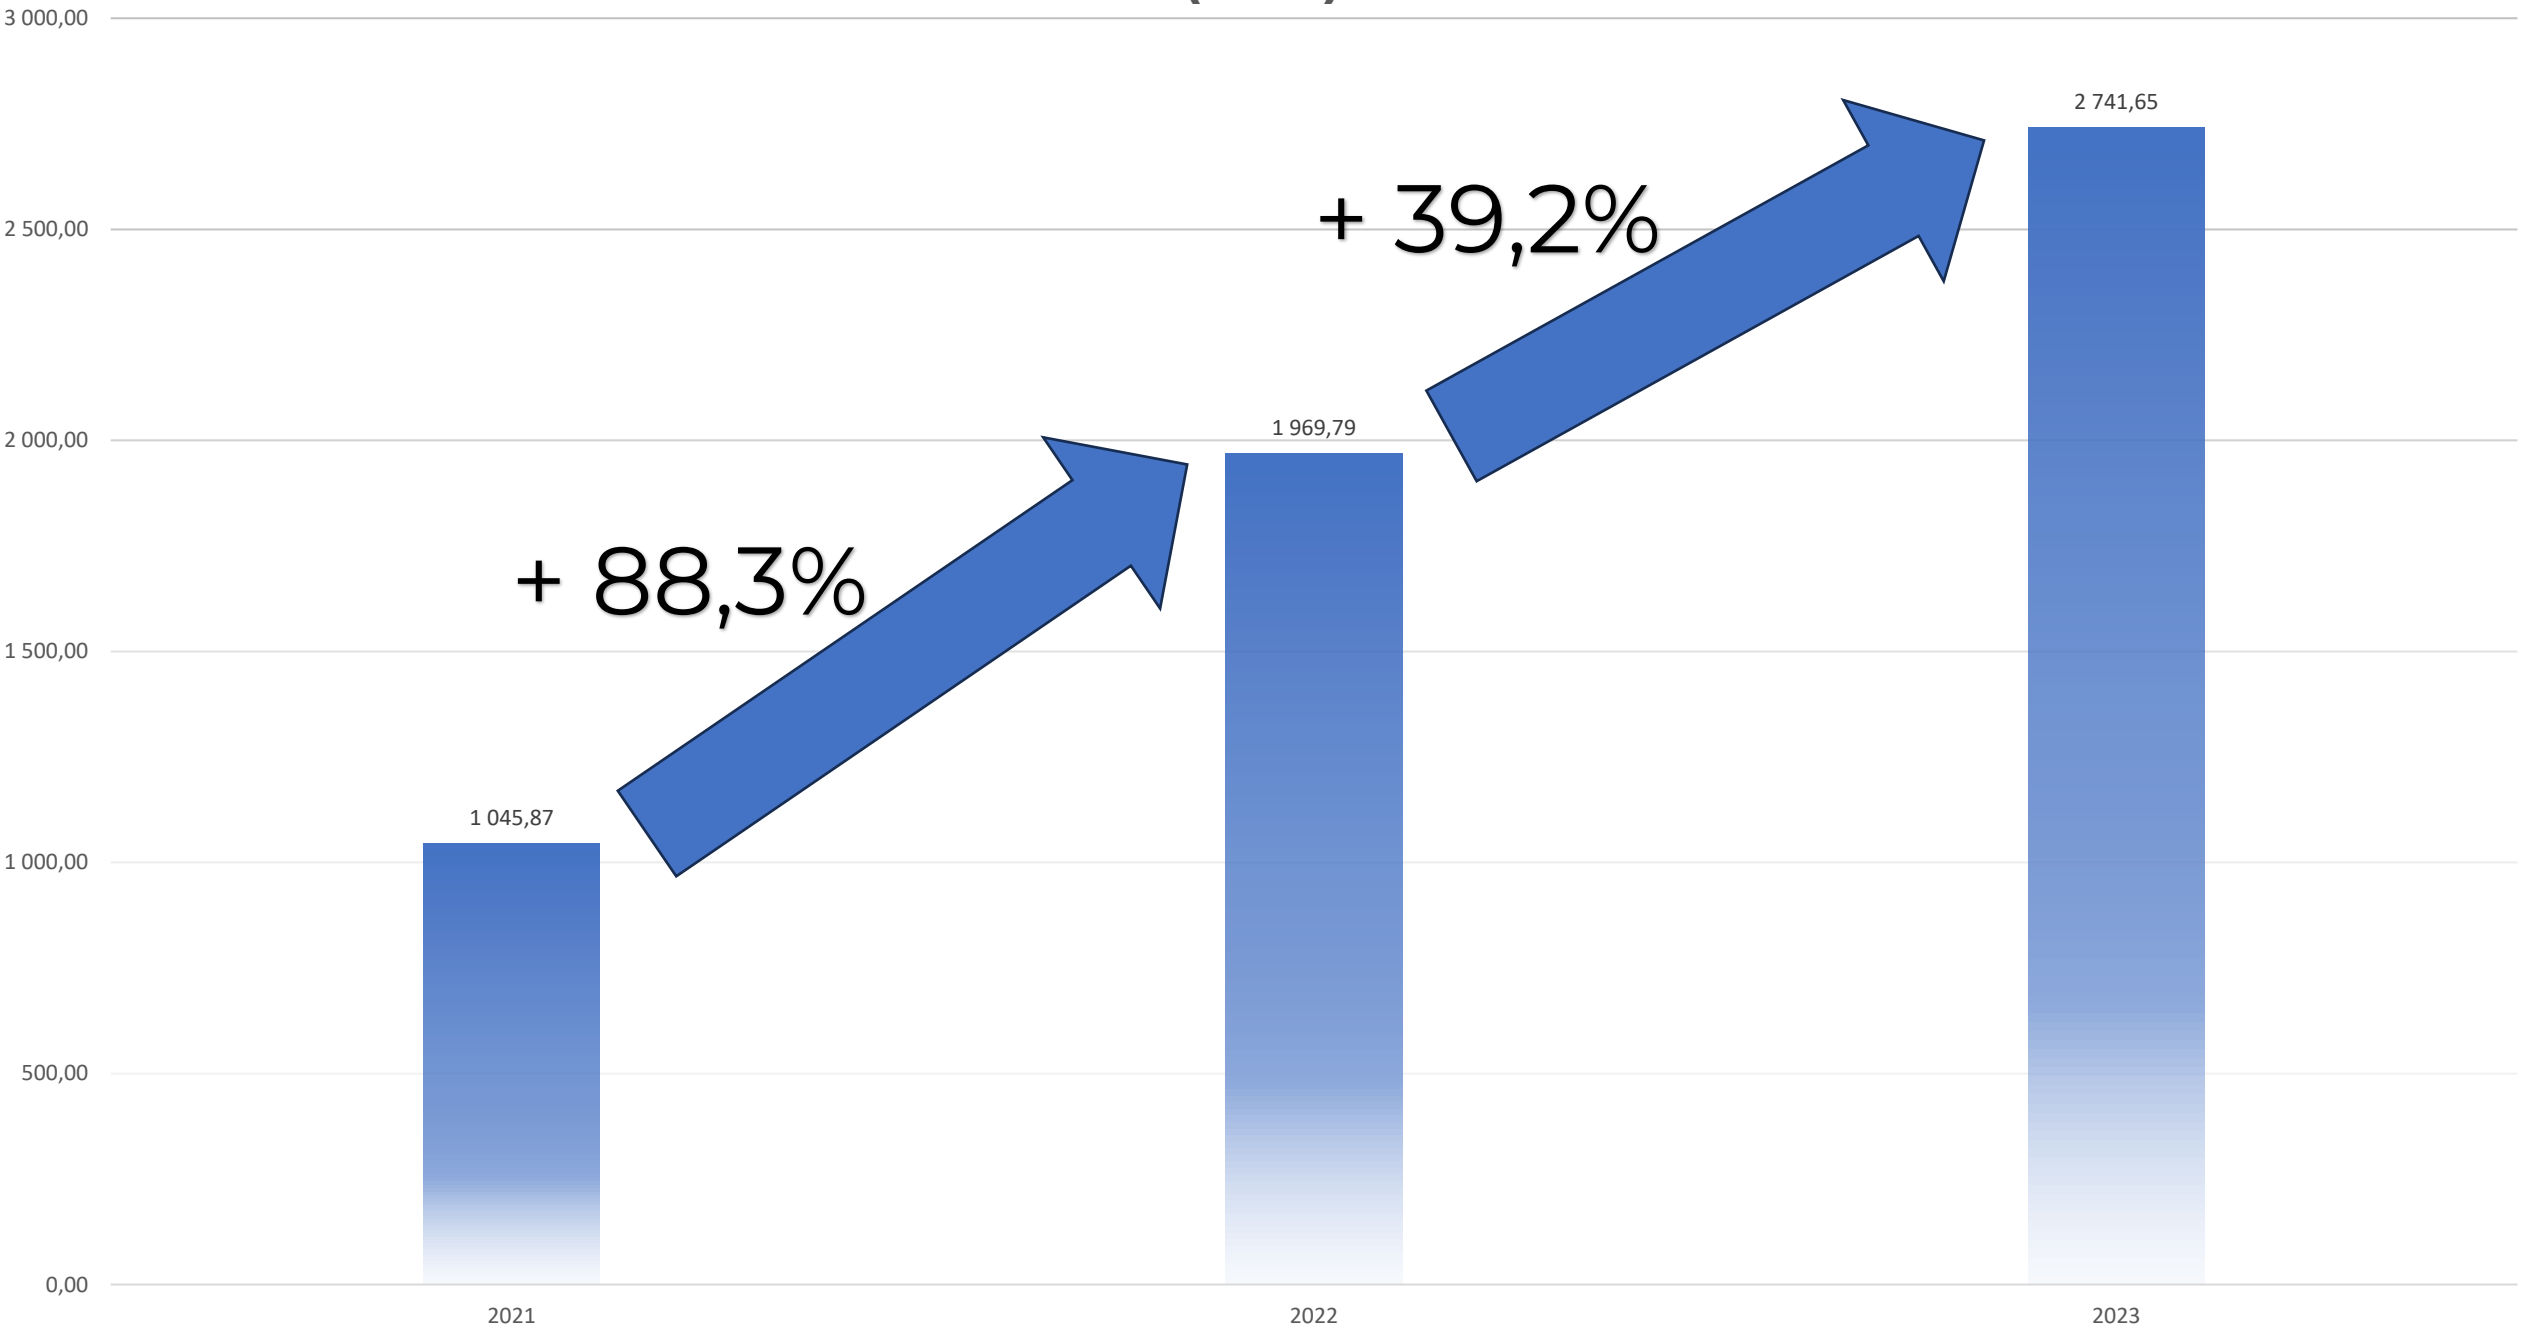

Initially **PROFICARGO** worked as an internal department of PROFITRAVEL Services Sp z o.o. which is responsible exclusively for the logistic part of business. After three years of growing, CEO decided to make the separation of these companies, and there we are – **PROFICARGO** as a separate entity. Air freight is our main passion, but other types of transport are also not a stranger to us.

General milestones

VOLUME (CBM) PER YEAR

Air freight

PROFICARGO is a licensed IATA agent with accreditation number 63-4 5140/0003.

We are dedicated to high quality and commitment to customer service, these are the main features that distinguish us from standard, commonly known, corporate procedures. Our clients are not anonymous and receive the time and attention they require. Please see the range of our services:

IMPORT / EXPORT (INCOTERMS 2020)

Comprehensive transport service based on all INCOTERMS 2020 conditions. Possibility of using preferential individual rates negotiated with airlines.

Stop. Think. Check.

TRANSPORT OF DANGEROUS GOODS - DGR

Preparation of goods and documentation necessary for the shipment of hazardous materials by a person with IATA DGR cat. 6.

TRANSPORT AT CONTROLLED TEMPERATURE

Organization of door-to-door transport with the maintenance of the required temperature thanks to cooperation with specialized subcontractors and appropriate services offered by airlines.

TRANSPORT OF RETURNING GOODS - INF-3, ATA CARNET

Assistance in preparing the shipment of returning goods in accordance with the INF-3 and ATA CARNET procedures in cooperation with agents around the world.

CUSTOMS SERVICE AND INSURANCE

As part of cooperation with an AEO-certified customs agency, we are able to offer customs services at the highest level while maintaining all standards. We offering also a cargo insurance at the customer's request.

SPECIALIST CONSULTING 24/7

We are available 24/7. In case of problems with transport during the weekend, we are able to react quickly and avoid delays.

Sea freight

Considering the costs, sea freight is a competitive solution compared to other types of transport. As part of sea freight, we organize comprehensive service of full container shipments (FTL), groupage shipments (LCL) and oversized loads. In addition, we select the optimal route of transport and advise the customer in choosing the right solution

Rail freight

Rail transport is a very interesting alternative between air and sea counterpart. The transit time is relatively shorter than transport organized by sea, but slightly longer than air transport. Proper selection of the route and cooperation with experienced customs agents allows us to create the offer to the customer needs.

Road freight

We are able to organize road transport throughout the country and whole Europe. Thanks to cooperation with the best carriers in Poland, we transport FTL as well as LCL. We also use proven subcontractors with means of transport that enable the transport of oversized goods or goods requiring special conditions.

Our networks

Founded in 2003, Global Logistics Network (GLN) is an umbrella organization that encompasses leading independently owned and operated companies worldwide that specialize in the logistics industry – including freight forwarders, transportation intermediaries and associated companies – all working together in a network environment to benefit from our “Power of One” philosophy.

From November 2023, we became a member of the TWIG Logistics network from Brazil. The network brings together 280 agents from 95 countries and offers modern solutions supporting cooperation between forwarding companies from all over the world. TWIG was founded in 2013 and also carefully verifies each new member of the group in terms of the quality of services provided.

Our software

„Designed as integrated forwarding software for air freight, ocean freight and customs, Scope has evolved into the Digital Standard for freight forwarding and Customs, which accelerates all processes and procedures.

Through integration of external ERP/WMS, Scope enables cross-system collaboration and network building, with focus on improved visibility for all stakeholders, quality enhancement, increased productivity, cost reduction and revenue improvement, customer loyalty and employee satisfaction.

The future of logistics is digital. Scope is the future of digital logistics.”
